VINFINITIES

CORPORATION | CAPABILITY STATEMENT

Federal Mission Support. From Planning to Execution.

SBA-Certified Woman-Owned Small Business | Founded 2011

Vinfinities delivers acquisition, program management, and technical support that advances federal missions. We integrate program, engineering, business, and operational expertise to move capabilities from requirements and acquisition through deployment, modernization, and sustainment.

CORE CAPABILITIES

Acquisition, Program & Portfolio Management
Develop acquisition strategies, integrate schedules, manage risk, track performance, and coordinate stakeholders.

Systems Engineering & Technical Assistance
Translate mission needs into technical requirements, coordinate engineering activities, and assess interfaces and integration risks.

Requirements, Test & Evaluation
Develop test plans, coordinate evaluations, analyze results, and document evidence for acquisition and deployment decisions.

Deployment, Logistics & Sustainment
Plan fielding, assess site readiness, coordinate logistics and training, and integrate sustainment requirements.

Program Analysis & Modernization
Analyze budgets and performance, improve processes, and coordinate technology refresh and configuration activities.

Strategic Communications & Change Management
Align stakeholders, prepare executive briefings, and coordinate communications, training, and operational adoption.

SELECTED FEDERAL MISSION EXPERIENCE

Leadership and practitioner experience across TSA security technology and DHS / CWMD / CBP lifecycle programs.

TSA security technology: Integrated acquisition, requirements, test and evaluation, configuration, deployment, logistics, and sustainment for fielded detection capabilities.

DHS / CWMD / CBP: Lifecycle SETA experience includes remote operations, radiation detection, field demonstrations, and deployment.

WHY VINFINITIES

Mission-informed execution
Federal acquisition and security technology experience connects planning with operational requirements.

Integrated lifecycle expertise
We align requirements, engineering, schedule, risk, and sustainment.

Accountable delivery
Defined responsibilities, quality reviews, and timely reporting maintain visibility into execution.
